REC_DS using C_Week 4_MCQ_Updated

Attempt : 1
Total Mark : 20
Marks Obtained : 1

Section 1 : MCQ

1. In what order will they be removed If the elements “A”, “B”, “C” and “D” are placed in a queue and are deleted one at a time

Answer

Status : Skipped *Marks : 0/1*

2. In a linked list implementation of a queue, front and rear pointers are tracked. Which of these pointers will change during an insertion into a non-empty queue?

Answer

Status : Skipped *Marks : 0/1*

3. Which of the following can be used to delete an element from the front end of the queue?

Answer

Status : Skipped ***Marks : 0/1***

4. Insertion and deletion operation in the queue is known as

Answer

Status : Skipped ***Marks : 0/1***

5. What does the front pointer in a linked list implementation of a queue contain?

Answer

-

Status : - ***Marks : 0/1***

6. After performing this set of operations, what does the final list look to contain?

```
InsertFront(10);
InsertFront(20);
InsertRear(30);
DeleteFront();
InsertRear(40);
InsertRear(10);
DeleteRear();
InsertRear(15);
display();
```

Answer

-

Status : - ***Marks : 0/1***

7. In linked list implementation of a queue, the important condition for a queue to be empty is?

Answer

Status : Skipped ***Marks : 0/1***

8. What is the functionality of the following piece of code?

```
public void function(Object item)
{
   Node temp=new Node(item,trail);
   if(isEmpty())
   {
      head.setNext(temp);
      temp.setNext(trail);
   }
   else
   {
      Node cur=head.getNext();
      while(cur.getNext()!=trail)
      {
         cur=cur.getNext();
      }
      cur.setNext(temp);
   }
   size++;
}
```

Answer

Status : Skipped ***Marks : 0/1***

9. The process of accessing data stored in a serial access memory is similar to manipulating data on a

Answer

-

Status : -   *Marks : 0/1*

10. When new data has to be inserted into a stack or queue, but there is no available space. This is known as

Answer

-

Status : -   *Marks : 0/1*

11. What will be the output of the following code?

```
#include <stdio.h>
#include <stdlib.h>
#define MAX_SIZE 5
typedef struct {
   int* arr;
   int front;
   int rear;
   int size;
} Queue;
Queue* createQueue() {
   Queue* queue = (Queue*)malloc(sizeof(Queue));
   queue->arr = (int*)malloc(MAX_SIZE * sizeof(int));
   queue->front = -1;
   queue->rear = -1;
   queue->size = 0;
   return queue;
}
int isEmpty(Queue* queue) {
   return (queue->size == 0);
}
int main() {
   Queue* queue = createQueue();
   printf("Is the queue empty? %d", isEmpty(queue));
   return 0;
}
```

Answer

-

Status :   - *Marks : 0/1*

12. Which of the following properties is associated with a queue?

Answer

-

Status :   - *Marks : 0/1*

13. A normal queue, if implemented using an array of size MAX_SIZE, gets full when

Answer

-

Status :   - *Marks : 0/1*

14. What are the applications of dequeue?

Answer

-

Status :   - *Marks : 0/1*

15. Which operations are performed when deleting an element from an array-based queue?

Answer

-

Status :   - *Marks : 0/1*

16. What will be the output of the following code?

```
#include <stdio.h>
#define MAX_SIZE 5
typedef struct {
   int arr[MAX_SIZE];
   int front;
   int rear;
   int size;
} Queue;

void enqueue(Queue* queue, int data) {
   if (queue->size == MAX_SIZE) {
      return;
   }
   queue->rear = (queue->rear + 1) % MAX_SIZE;
   queue->arr[queue->rear] = data;
   queue->size++;
}
int dequeue(Queue* queue) {
   if (queue->size == 0) {
      return -1;
   }
   int data = queue->arr[queue->front];
   queue->front = (queue->front + 1) % MAX_SIZE;
   queue->size--;
   return data;
}
int main() {
   Queue queue;
   queue.front = 0;
   queue.rear = -1;
   queue.size = 0;
   enqueue(&queue, 1);
   enqueue(&queue, 2);
   enqueue(&queue, 3);
   printf("%d ", dequeue(&queue));
   printf("%d ", dequeue(&queue));
   enqueue(&queue, 4);
   enqueue(&queue, 5);
```

```
    printf("%d ", dequeue(&queue));
    printf("%d ", dequeue(&queue));
    return 0;
}
```

Answer

-

Status : - *Marks : 0/1*

17. What will the output of the following code?

```
#include <stdio.h>
#include <stdlib.h>
typedef struct {
    int* arr;
    int front;
    int rear;
    int size;
} Queue;
Queue* createQueue() {
    Queue* queue = (Queue*)malloc(sizeof(Queue));
    queue->arr = (int*)malloc(5 * sizeof(int));
    queue->front = 0;
    queue->rear = -1;
    queue->size = 0;
    return queue;
}
int main() {
    Queue* queue = createQueue();
    printf("%d", queue->size);
    return 0;
}
```

Answer

-

Status : - *Marks : 0/1*

18. The essential condition that is checked before insertion in a queue is?

Answer

-

Status : **-** ***Marks : 0/1***

19. Which one of the following is an application of Queue Data Structure?

Answer

All of the mentioned options

Status : Correct ***Marks : 1/1***

20. Front and rear pointers are tracked in the linked list implementation of a queue. Which of these pointers will change during an insertion into the EMPTY queue?

Answer

Status : Skipped ***Marks : 0/1***
